Karson M. Miller

Chief Technology Officer & Product Leader -
AI, SaaS, and Mobile Platforms

Phone: 516-384-5952
Email: karson.m.miller@gmail.com
Location: Washington DC-Baltimore Area
Work authorization: U.S. Citizen

Professional Summary

Technical product executive with more than a decade leading AI, SaaS, and mobile products at Google, Salesforce, Microsoft, and venture-backed startups. Ten years building AI products - from natural language understanding and Einstein Bots at Salesforce to leading Google Search Labs, the experimentation launch vehicle for generative AI in Search, and multi-participant conversational agents as a CTO. A Georgia Tech electrical engineer who still builds: hands-on across Swift, Python, and cloud platforms, with a record of taking zero-to-one products from proof of concept to general availability and scale. Holder of three U.S. patents spanning conversational AI and marketplace systems.

Skills & Expertise

Leadership & Product: Product Leadership, Product Strategy, Zero-to-One Product Development, Experimentation & Staged Rollout, Platform Product Management, Cross-Functional Leadership, Organization Scaling

AI & Machine Learning: Generative AI, Conversational AI, Natural Language Understanding (NLU), Agent Orchestration, Agent Evaluation, Deep Learning, Recommendation Systems, Gemini, Google Genkit

Engineering & Platforms: Mobile Platforms (iOS, Android, React Native), SaaS Platforms, IoT & Event-Driven Architecture, Cloud Architecture & Migration, CI/CD

Languages & Data: Swift, Objective-C, JavaScript, Python, Django, Go, C#, Java, C/C++, Angular, PostgreSQL, MongoDB, RabbitMQ, Terraform

Education

Bachelor of Science in Electrical Engineering | Georgia Institute of Technology

Experience

CTO | **Conveen AI** | March 2024 – Present
- Serve as chief technology and product executive for a conversational AI concierge, setting technical strategy and product architecture while remaining hands-on in Swift, JavaScript, Google Genkit, and Gemini on GCP and Firebase.
- Lead development of multi-participant conversational agents built on agent orchestration, tool use, and shared group context, with agent evaluation and observability built in to raise quality.
- Drive engineering decisions on inference latency, infrastructure reliability, and cost efficiency, shipping through CI/CD with rapid prototyping and continuous user testing.

Product Architect | **Google** | April 2022 – March 2024 | Mountain View, CA
- Led Google Search Labs - the experimentation program and launch vehicle for generative AI in Search - across Android, iOS, and Chrome desktop, owning incubation, staged rollout, and executive direction for experiments run by product teams across Search, and driving adoption for millions of users.
- Drove the rollout path for separately owned experiments including SGE, Code Tips, Add to Sheets, SGE while browsing, Notes, and Talk to a Live Rep - the flagship generative-AI experiment expanded through Labs to more than 120 countries and territories with four new languages.
- Drove iOS product architecture and user experience for the native Google Search app, using product analytics to grow daily active users, app store ratings, and cross-platform engagement - including Search Labs access in the app and the iOS Lock Screen Search widget.

Head of Product | **Polly.io** | April 2019 – October 2021 | San Francisco, CA
- Led product management for an end-to-end mortgage capital markets platform spanning rate lock through loan sale and delivery, including a real-time secondary market facilitating billions of dollars in mortgage sales with participation from 95% of major US banks and mortgage buyers.
- Built and scaled a cross-functional organization of product managers, UX designers, engineering managers, and full-stack developers through two Series A funding rounds totaling $20M - a $5M Series A and a $15M Series A led by 8VC with Menlo Ventures, Meritech Capital, Fifth Wall, and Base10 Partners - shipping MVP releases of four products on a single SaaS platform.
- Provided hands-on technical leadership across Python/Django, Angular, and C# services on PostgreSQL, MongoDB, and RabbitMQ; migrated infrastructure from Heroku to AWS and implemented CI/CD, with Metabase for analytics.

Director of Product | **Salesforce** | April 2016 – April 2019 | San Francisco, CA
- Led Einstein Bots from proof of concept to multilingual general availability, establishing Salesforce's conversational AI offering for enterprise customer-service automation.
- Directed six scrum teams delivering scalable natural language understanding chatbot systems powered by deep learning models, reducing customer-service costs for businesses by 30%.
- Served as platform product manager for IoT Cloud (powered by Thunder), helping migrate the platform from its custom AWS architecture onto Salesforce's core architecture - event ingestion and processing at a scale of billions of events a day from connected devices, sensors, and applications.

Senior Product Manager | **RealmDb** | December 2015 – April 2016 | San Francisco, CA
Y Combinator S11 | Exited - Bought by MongoDB, Inc.
- Launched Realm React Native - Realm's first JavaScript product and the first third-party mobile database with dedicated React Native support - for an open-source database positioned as an alternative to ORMs and SQLite.
- Took Realm Xamarin (C#/.NET) through beta and shipped pre-1.0 releases across the existing Swift/Objective-C and Java product lines, focused on developer experience and memory, disk, and battery efficiency.

Senior Product Manager | **Jobr** | January 2015 – December 2015 | San Francisco, CA
Acquired by Monster.com
- Managed product development for two mobile job-discovery apps across Android and iOS, featured on the iOS App Store front page and ranked in the top five business apps.
- Designed and implemented a machine learning recommendation engine for a Go backend to improve relevance and per-user profitability.

Program Manager | **Microsoft** | September 2012 – January 2015 | Redmond, WA
- Led cross-functional teams for the original launch of Office on iPad and iPhone - the first-ever release of Word, Excel, and PowerPoint for iOS - reaching more than 40 million downloads on iPad, and drove ongoing Office and OneNote development across iOS and Mac.
- Established a company-wide iOS beta testing program supporting over 100,000 employees and more than 50 apps.

Systems Engineer | **Cisco** | May 2010 – August 2011 | San Jose, CA
- Developed wireless LAN controllers and researched intrusion detection system integration in the Wireless Networking Business Unit, collaborating across teams to improve network security and performance.

Early Career • New York, NY • 2005 – 2009
- Lighting Director | Great Neck Park District | 2007 – 2009
- Security Auditor & Network Consultant | Self-employed | 2007 – 2009
- Computer Vision Researcher | Pace University Robotics Laboratory | 2006 – 2007
